

## Bring Hotel linen home!

How many of us have treated ourselves to a special 4 or 5-star weekend at a country house hotel or 'top-notch' B&B and come away wanting to recreate that experience at home? Sliding between high quality, impeccably laundered, organic sheets after a busy day of sightseeing, is one of the highlights of a weekend away and Fou Furnishings says that those sheets are one feature that you can take home with you.

A web-based company supplying bed linen to a growing number of top guest houses and B&Bs across the U.K, Fou Furnishings offers high quality organic linens, sourced from the finest organic cottons, in very high thread counts and finished to exacting standards, all at very competitive prices and certified by the UK Soil Association or Oeko-Tex. The products are all available in thread counts up to 600, crafted from 100% Egyptian cotton. As a mark of quality, the brand reports that its bed linens have made the top three best Organic Textile Products for the second year running.
